~*~HAULED WATER PRICES ON THE RISE!!~*~ The RVF Community is a known hauled water community for over 50 years. All hauling companies operate 24/7 within the community. All three hauling companies provide an invaluable service to our community and add value; I know both Dynamite Water and Rio Verde Water have in the past helped put out several fires before Rural Metro could respond in time with water resources; Dynamite Water LLC put out six fires this last fire season alone with emergency water resources. It is publicly known Kip Micuda turned in the hauled water companies and all three have been found in violation with Maricopa County. The current results in meetings with Maricopa County are for the hauling companies to obtain Special Use Permits for the parking of water trucks within our

respond in time with water resources;
 Dynamite Water LLC put out six fires this
 last fire season alone with emergency
 water resources. It is publicly known Kip
 Micuda turned in the hauled water
 companies and all three have been found
 in violation with Maricopa County. The
 current results in meetings with
 Maricopa County are for the hauling
 companies to obtain Special Use Permits
 for the parking of water trucks within our
 community. The Special Use Permits are
 costly! \$3500 - \$10,000 depending on
 where the trucks park (prices can
 fluctuate based on flood plain/
 engineering/drainage&grading). The
 haulers will now have to raise the price of
 hauled water to offset the cost of Special
 Use Permits. Kip and Ann-Haugen
 Micuda are now responsible for driving
 up the price of water for THE ENTIRE
 RVF community due to their complaints!
 Shame!!!
